

Shooting Stars

by Finlay Dark

Look up into the deep blue sky,
And see something bright flying by -
A magical orb of a sun flame spark,
Whistling by in the dark.

Could it be a U.F.O
Or a fireball from a Martian volcano?
But NO! ...
It's a fiery block from a burning rock.

There is no telescope needed to see
The burning ball of mystery,
It's all there for the eye to see...

The shooting star...
Is no longer history.
